## What Happens When The Sun Goes Down

School  
1962

Me

2016 — 2018 — 2020

### Key Information

#### We are going to learn;

1. About animals that are awake at night.
2. What we do when it gets dark.
3. What light sources are used for.
4. About Earth and space.
5. Celebrations that happen in the Autumn.

This is planet Earth in space.

### Key vocabulary

	<p>Day happens when the sun is up. Night happens when the sun sets and we see the moon.</p>		<p>Natural light comes from gas or a spark, like a flame.</p>
	<p>Nocturnal means awake at night time.</p>		<p>Space is where the planets and stars are. Astronauts go to space.</p>
	<p>Diurnal means awake in the day time.</p>		<p>Earth is the planet we live on.</p>
	<p>Habitat is a place that certain plants and animals live.</p>		<p>The Sun is a star. All stars are burning gas.</p>
	<p>Light sources can be electric or natural. They give off light so we can see them.</p>		<p>A planet orbits the sun.</p>
	<p>Electric lights uses power from a battery or a mains plug.</p>		<p>A moon orbits a planet.</p>
